## DISORDERS OF THE UDDER

Prompt Attention Will Often Prevent  
Serious Trouble With Fresh Cows

Too little attention is paid to the external and physical conditions of the milk cow, as a general rule. Frequently a cow's usefulness may be impaired and sometimes destroyed by neglecting certain little things which the milker may do to protect both the cow and the milk.

### CONGESTION OF THE UDDER

In heavy milkers, before and just after calving, it is the rule that the mammary gland is enlarged, hot tense and tender, and that a slight exudation or pasty swelling extends forward from the gland on the lower surface of the abdomen.

This physiological congestion is looked upon as a matter of course, and disappears in two or three days when the secretion of milk has been fully established.

This breaking up of the bag may be greatly hastened by the sucking of a hungry calf and the kneading it gives the udder with its nose; by stripping the glands clean thrice daily, and by active rubbing at each milking with the palm of the hand, with or without, lard, or better, with camphorated ointment.

The congestion may be at times aggravated by standing in a draft or cold air or by neglect to milk for an entire day or more (over-stocking, hefting) with the view of making a great show of udder for the purpose of sale. In such cases the surface of the bag pits on pressure, and the milk has a reddish tinge or even streaks of blood, or it is partially or fully clotted and is drawn with difficulty, mixed, it may be, with a yellowish serum (whey) which has separated from the casein. This should be treated like the above, though it may sometimes demand fomentations with warm water to ward off inflammation, and it may be week before the natural condition of the gland is restored.

## A Tonic For Women

"I was hardly able to drag, I was so weakened," writes Mrs. W. F. Ray, of Easley, S. C. "The doctor treated me for about two months, still I didn't get any better. I had a large family and felt I surely must do something to enable me to take care of my little ones. I had heard of

## CARDUI The Woman's Tonic

"I decided to try it," continues Mrs. Ray. "I took eight bottles in all. I regained my strength and have had no more trouble with womanly weakness. I have ten children and am able to do all my housework and a lot of out-door work. I can sure recommend Cardui."

Take Cardui today. It may be just what you need.

## GEN. LEONARD WOOD MAKES APPEAL FOR NEAR EAST RELIEF

Says Two and a Half Million  
Starving Armenians Need  
Help at Once.

Ft. Sheridan, Ill.—Major General Leonard Wood, commanding the Sixth Corps Area, has issued a Lenten sacrifice appeal for funds to save the Armenians from annihilation by starvation and disease. "I feel that however many and however worthy the other appeals which are being made to the great heart of America these days may be," he says, "this cry from the little children cannot remain unanswered."

The Near East Relief, 1 Madison avenue, New York City, which has been charged by Congress with the American relief work in the whole Near East, has formed a special "Lenten Sacrifice Appeal Committee," of which Major General Wood is chairman, Charles V. Vickery secretary and Cleveland H. Dodge treasurer, to put before the American people the desperate need of the Christian populations of the Near East, who have suffered and are still suffering the horrors of war.

Among the prominent members of General Wood's Committee are Secretary of the Treasury Andrew W. Mellon, Mrs. Corinne Roosevelt Robinson, sister of the late President Roosevelt; ex-President W. H. Taft, Mary Garden, President John Grier Hibben of Princeton University, Bishop-Elect William T. Manning of New York, Dr. Henry van Dyke, David Belasco, Samuel Gompers, Frank A. Munsey, Mrs. Carrie Chapman Catt, Mrs. Henry Morgenthau, John G. Milburn of the American Bar Association, Miss Elizabeth Marbury and Mrs. Medill McCormick of Chicago.

General Wood's Appeal

As Chairman of a Special Committee of representative men and women of the country, charged with placing before the American people the desperate need of two and a half million Armenians, the remnant of the oldest Christian nation, whose sufferings through sixteen centuries seem to have brought them no nearer peace, liberty or security, I beg your personal co-operation and influence to forward an appeal for a Lenten Sacrifice Offering to enable the Near East Relief to go on with its work of mercy.

Over one hundred thousand little children who have been kept alive by American generosity for the past three years are absolutely dependent upon the support which America gives them through the Near East Relief.

I feel that however many and how ever worthy the other appeals which are being made to the great heart of America these days may be, this cry from the little children of the land where Christ gave his life for mankind cannot remain unanswered.

Will you help to save this martyred people?

earing a pair of rubbers.

The person who assumes these coverings must be careful not to come in contact with anything except the floor. Providing he follows this instruction he can not possibly be injured by the lightning in any way.

The explanation is simple enough. The electric fluid before it can pass into a human being or animal must first come in contact with the earth. Its passage from the earth to the wearer of the rubbers is, of course, stopped by the soles of the latter.

So next time a storm is brewing hurry up and get out your rubbers.
